

Company presentation **CONENGA Group**

Vienna, 2025

We do it.

Science meets practical expertise – for the future of your technical systems

As highly effective experts, we design consulting, engineering and plant construction projects. We distinguish ourselves through our systematic approach.

Our strengths are in process and control engineering, plant engineering, management and the comprehensive combination of these skills.

Our mission

As an innovative organization, we connect people with the skills, the will, and the drive. This enables us to create the solutions needed to make decarbonization and true sustainability a reality.

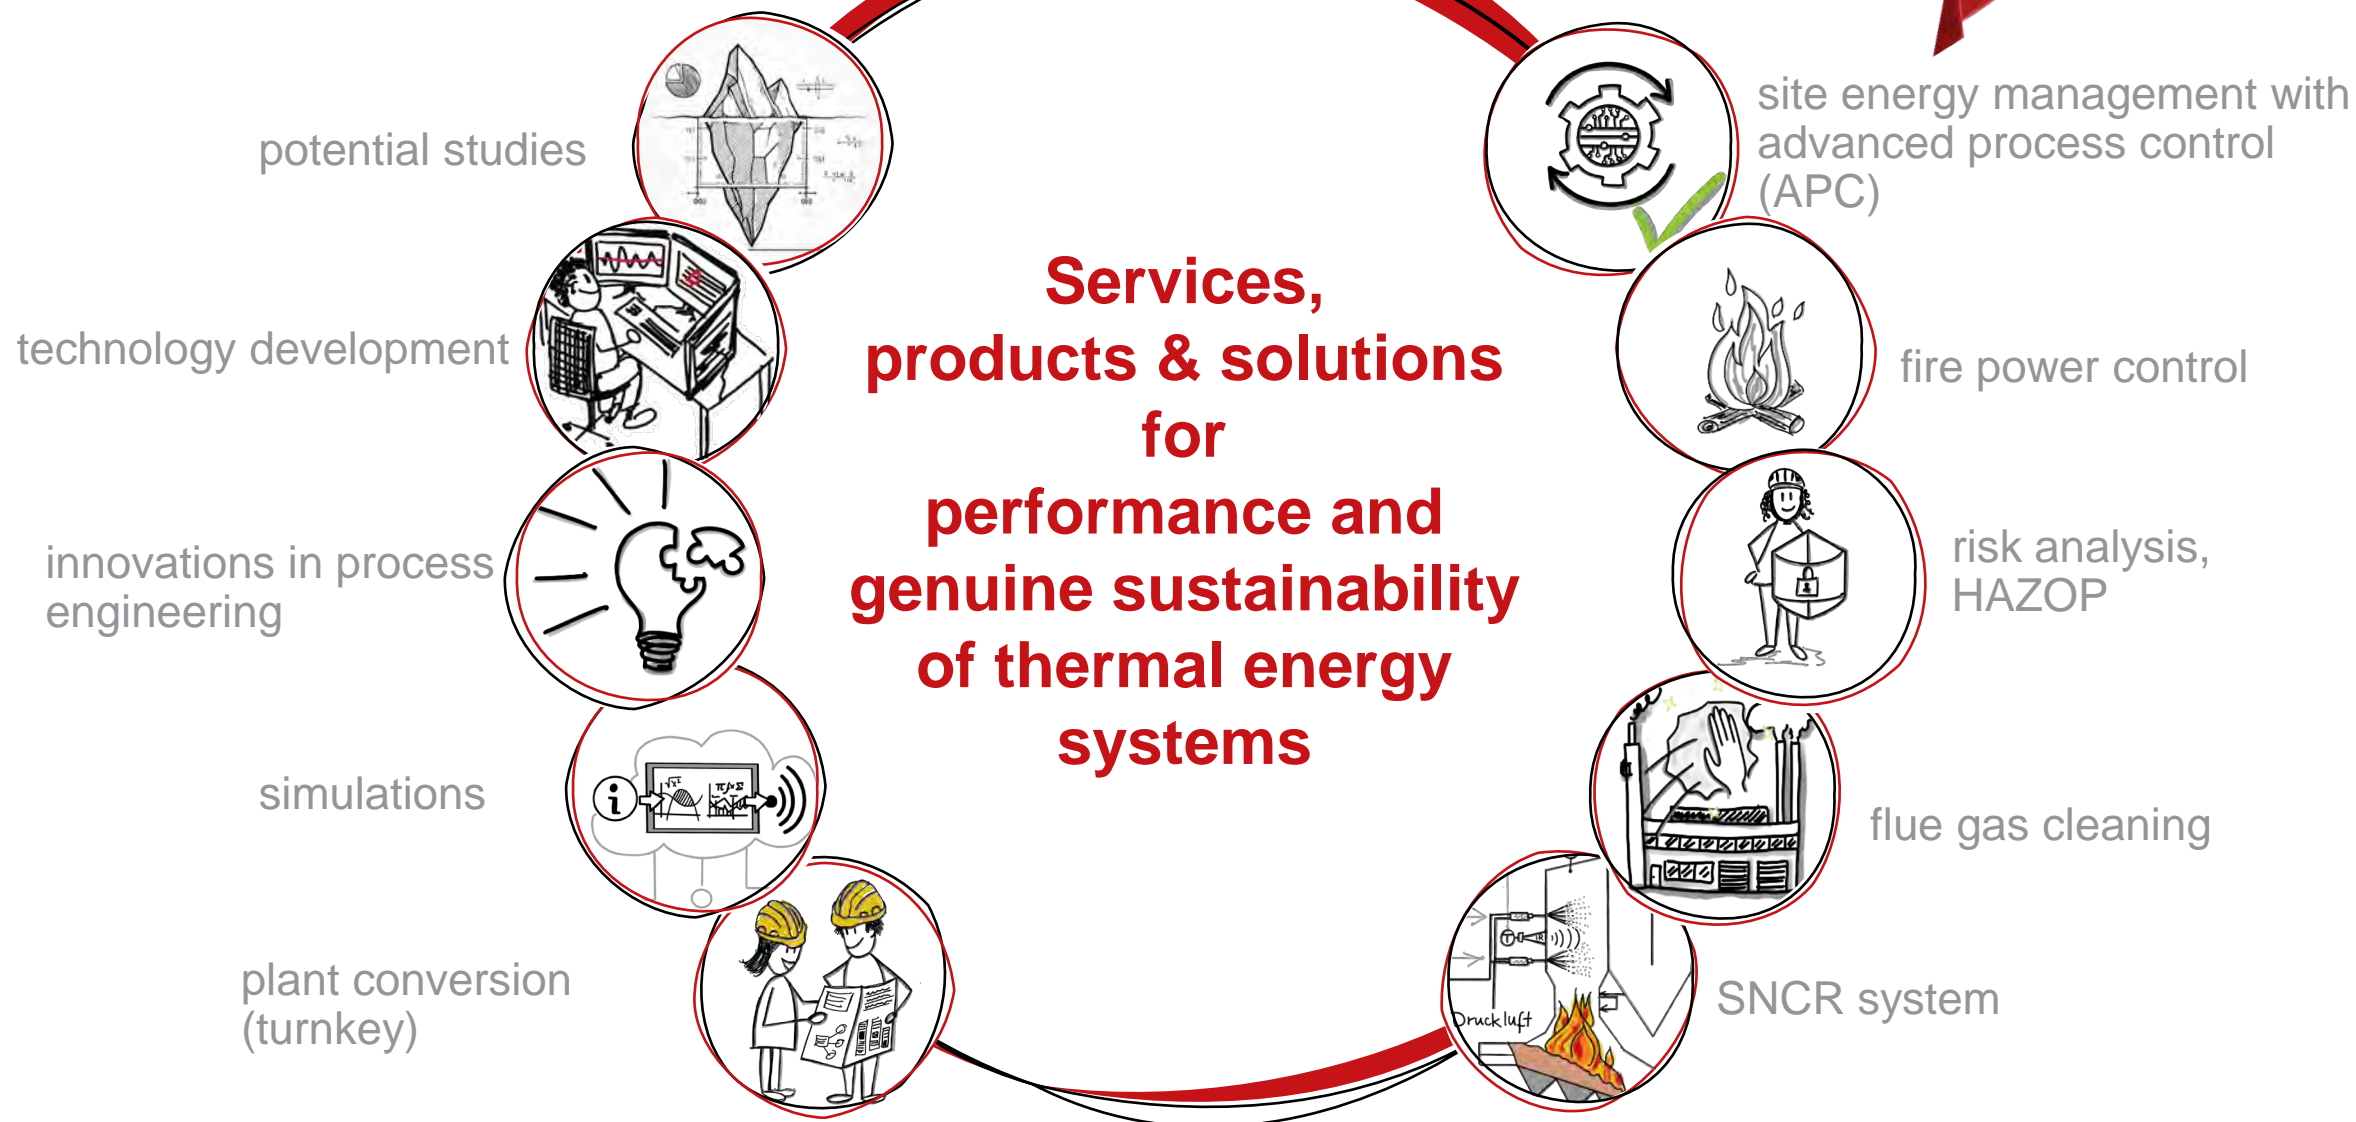

Together with our customers, we solve technological, structural, and organizational challenges on the journey towards decarbonization.

As an organization, we are the go-to place for performance-oriented experts who work with heart, passion, and know-how on the technology, engineering, and structure of extraordinary solutions.

The personal growth of our experts is just as important to us as customer benefit and the perceived quality of our consulting and results. The trust of the people we work with is our key benchmark.

Our services

Our perspective

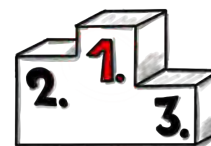

With our expertise, we make supposedly impossible things possible

We consider the entire system and take changing requirements for plants into account

When optimizing technical systems, we strive to achieve genuine sustainability

Our projects enhance our customers' expertise and contribute to their success

We offer practical solutions for saving energy, reducing emissions, and minimizing downtime

We are visionaries and together with our customers we develop the optimal approach in projects

Our development

1999: FACT Consulting

FACT Consulting was founded by Franz Peter Walder. The focus is on process design, quality management, strategy and organizational development.

2011: First collaboration

FACT Consulting and VOIGT+WIPP Engineers are successfully working on their first joint projects.

2013: VOIGT+WIPP group

VOIGT+WIPP Engineers is being reorganized into a group by Richard Wipp. Andreas Voigt is pursuing other professional opportunities.

2024: All in CONENGA

Revision of the CONENGA brand strategy and adaptation of company names. The team, owners, and management remain unchanged, and market communication is simplified.

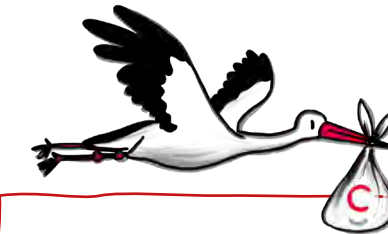

2007: VOIGT+WIPP Engineers

VOIGT+WIPP Engineers is founded by Richard Wipp and Andreas Voigt. The aim is to combine cutting-edge research with industrial applicability, thereby providing customers in the process industry with a unique selling point.

2019: Joint project

An extensive project by FACT Consulting and VOIGT+WIPP Engineers in digital transformation highlights the opportunities offered by combining strategy and technology.

2020: CONENGA Group

Founding of the CONENGA Group as a joint venture between Franz Peter Walder and Richard Wipp. The company's success lies in combining many years of management consulting experience with outstanding technological expertise.

2021: A shared location

The company moves into its new premises at Auhofstraße 1, 1130 Vienna. The new office offers a spacious and modern infrastructure, enabling personnel growth and thus very positive further development.

Our leadership

In our management, we combine seemingly opposites to form a strong unit:

With an innovative and visionary mindset, we boldly break new ground.

We are balanced, empathetic, and always put our heart into what we do.

At the same time, we act in a results-oriented, precise and focused manner.

“For me, leadership means setting the course, prioritizing, and avoiding demotivation. As managing director, it is my responsibility to ensure strategic clarity, enable self-determination within the organization, and ensure the energy needed.”

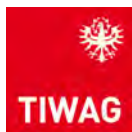

“As a manager, I pursue an innovative and visionary way of thinking. Managing day-to-day business is just as important to me as driving change forward. I encourage cross-disciplinary thinking, which often leads to unconventional solutions. This enables us to achieve true innovation and the sustainable development of our team.”

“For me, leadership is not just about decisions and results, but especially about how you treat the people in your team. My goal is to build trust, understand individual needs within the team, and thus create a productive environment in which everyone feels heard and valued.”

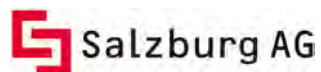

Our customers

Ein Gemeinschaftsunternehmen
der TIWAG und
der Stadtwerke Kufstein

bio
energie
kufstein

“The district heating output forecast implemented by CONENGA and calculated using an AI model is helping us to further reduce our fossil CO₂ emissions. Thanks to the team of CONENGA Group for many years of efficient cooperation.”

Walter Eisenmann, Managing Director, Bioenergie Kufstein

“Potential for optimizing the control systems of process engineering plants often remains untapped. With the EPOC® Suite and the in-depth expertise of CONENGA's experts in the field of model predictive control, we have tapped into this potential at our fluidized bed power plant and can now enjoy significant CO₂ savings and an increase in the amount of fresh steam.”

**Dipl.-Ing. Michael Merkel, Manager Energy Strategy,
UPM Schongau**

“Over many years, CONENGA's sound recommendations, technical expertise, and customer-focused approach have enabled us to enjoy an extremely positive and successful partnership.”

**Ing. Günther Seiffter, Grids/Heating Networks Department,
Salzburg AG**
